

KRISHNA KUMAR M

Senior Software Engineer (SRE / DevOps Engineer)

Contact: +91 8056201467 | LinkedIn: <https://www.linkedin.com/in/krishna-kumar-35ba771b3> | Place: Chennai, India
Mail: krishnakumar.2015123@gmail.com | Portfolio: https://krishnakumarkrish.github.io/Krishna_Portfolio/index.html

PROFILE SUMMARY :

- Highly effective **Senior Software Engineer** with **4+ years of experience** at HCL Technologies specializing in Cloud, DevOps, and Full-Stack development, seeking a challenging and rewarding position to utilize my skills in designing, developing, automating, and deploying high-quality innovative software solutions.
- Proven track record of delivering scalable **AWS solutions** and **automating complex workflows** to enhance business productivity.
- Expert in the full Software Development Life Cycle (**SDLC**), with a focus on migrating legacy on-prem systems to high-availability cloud environments.
- Worked with **Japanese** and **US clients** to understand their requirement and enhance the existing features.
- Adaptive to learn new technologies and components.

TRAININGS AND CERTIFICATIONS :

- Amazon Certified: **AWS Developer – Associate** - [Credential](#)
AWS DevOps Engineer – Professional (**In Progress**)
- Google Certified: **Cloud Digital Leader** - [Credential](#)
- Microsoft Certified: **PL-900 Microsoft Power Platform Fundamentals** and **PL-200 Microsoft Power Platform Functional Consultant**.
- UX & UI Design:** Course completion for Figma, Adobe XD, and Photoshop. Projects - [Behance](#)
- Certification for Completion of **Python and Linux** from IIT Bombay.
- English Type Writing in Senior Grade (**First Class with Distinction 40 – 45 Words Per Minute**) from Government of Tamil Nadu.

TECHNICAL SKILLS :

- Cloud & Containerization:** AWS, Docker, Kubernetes
- Infrastructure as Code (IaC) & Build Tool:** Terraform, Ansible, Maven.
- Source Code Management & CI/CD:** Git, GitHub, GitLab, Jenkins.
- Monitoring & Code Quality:** Prometheus, Grafana, SonarQube.
- Scripting & Programming:** Shell Scripting (Bash), Perl, Python, PHP, ASP.Net, SQL.
- Operating Systems:** Linux/Unix, Windows.
- Frameworks:** ITSM (Incident, Change, Service Request, and Demand Management).

PROFESSIONAL EXPERIENCE :

HCL Technologies - Chennai | Senior Software Engineer - November 2021 – Present

Key Projects, Roles and Responsibilities:

- Migrating the application **from On-Prem to AWS Environment**, enabling cloud scalability and modernization.
- Optimize costs and ensure scalability, availability, and reliability of cloud services across AWS infrastructure.
- Implemented **Prometheus**-based monitoring and built **Grafana** dashboards with custom alerts, improving application observability and **reducing incident response time by 40%**.
- Automated **server monitoring, disabling inactive users and log cleanup** using Bash shell scripting, reducing manual maintenance time **by 20 hours per month** and **preventing 95%** of disk-space-related outages.
- Synchronized cross-functional team workflows using **Agile methodologies** to secure on-time project delivery.
- Resolved production issues by troubleshooting and debugging existing software programs, ensuring 99.9% system uptime.
- Collaborated with QA teams to validate application functionality post AWS migration, ensuring system stability and achieving zero critical defects in production.
- Gathered business new requirements **directly from business users**, explained technical concepts clearly to non-technical stakeholders, and **led weekly review meetings**.
- Resolved client-reported issues using monitoring and logging tools, improving system reliability and reducing resolution time, ensuring **high customer satisfaction**.
- Implemented Microservices architecture with **Blue-Green and Canary deployment** strategies to achieve high availability, fault isolation, and zero-downtime releases.
- Automated infrastructure** provisioning using Infrastructure as Code, reducing environment deployment times by 45%.
- Established and managed Git-based version control systems, standardizing repository structures and branching models for streamlined team collaboration.
- Provided documentation and knowledge sharing to ensure the smooth onboarding of new team members.
- Performed proactive system health checks using monitoring tools to identify and resolve issues before production impact.

1. Japan CMS (NOKIA):

- Automated deployments:** Set up Jenkins CI/CD pipelines integrated with **SonarQube** for continuous code quality analysis, automating code delivery to production environments and **improving release reliability and speed**.
- Feature development:** Developed and added new features to existing applications using **Perl, PHP, and Shell Scripting**.
- Database reporting:** Managed and provided monthly billing data directly from the database to support business operations.

2. Cloud DevOps (NOKIA):

- AWS Infrastructure:** Architected scalable **AWS solutions** using EC2, S3, VPC, and RDS to enhance system reliability, high availability, and data durability.
- Orchestration & Scaling:** Deployed **Auto-Scaling** and Elastic Load Balancing (**ELB**) within Amazon EKS clusters to optimize performance and fault tolerance.
- Infrastructure as Code (Terraform & Ansible):** Implemented Infrastructure as Code using **Terraform** and **Ansible** to provision, configure, and manage cloud resources.
- CI/CD Pipeline:** Engineered automated CI/CD pipelines using **Git, Jenkins, and Maven** to streamline continuous integration and build processes.
- Containerization:** Authored and optimized **Dockerfiles** to automate the creation of **lightweight**, portable Docker images.

3. Claims Dispute System (NOKIA):

- IIS Server Administration & Troubleshooting:** Managed and troubleshoot IIS servers hosting ASP.NET applications on Windows Server, ensuring **high availability and optimal performance**.
- Identity & Access Management (IAM):** Provided web application access to users using SQL database-level access control while maintaining security compliance.
- Feature Development:** Developed and **integrated new functional modules using** ASP.NET and Oracle SQL to enhance application capabilities.
- Issue Resolution:** Managed end-to-end resolution for user claims, disputes, and approval workflow bottlenecks.

AWARDS AND ACHIEVEMENTS :

- I received a **cash award** for my work refactoring legacy reporting modules, where I replaced text-based outputs with Excel exports using Shell scripting and Perl.
- Appreciation **received from Project Delivery Manager** for completing multiple Demands and Changes tickets in the 3rd Quarter of 2024.
- Received Gold Club award for Top Performer in the 3rd Quarter of 2024.

EDUCATION:

D.G. Vaishnav College
M.Sc. Computer Science – 78.5%

2018 - 2020
Chennai

Date of Birth: 28-November-1997
