KRISHNA KUMAR M

Senior Software Engineer

+91 8056201467 | LinkedIn | Portfolio | krishnakumar.2015123@gmail.com | Chennai, India

CAREER OBJECTIVE :

To obtain a challenging and rewarding software engineering position that utilizes my skill and experience to design, develop, automate and deploy high quality innovative software solutions.

PROFILE SUMMARY :

- Highly effective **Senior Software Engineer** with **4+ years of experience** at HCL Technologies specializing in Cloud, DevOps, and Full-Stack development.
- Proven track record of delivering scalable AWS solutions and **automating complex workflows** to enhance business productivity.
- Expert in the full Software Development Life Cycle **(SDLC),** with a focus on migrating legacy on-prem systems to high-availability cloud environments.
- Worked with **Japanese** and **US clients** to understand their requirement and enhance the existing features.
- Adaptive to learn new technologies and components.

TRAININGS AND CERTIFICATIONS :

- Amazon Certified: **AWS DevOps** Certification is in progress
  AWS Developer – Associate - Credential
- Google Certified: **Cloud Digital Leader -** Credential
- Microsoft Certified: **PL-900 Microsoft Power Platform Fundamentals** and
  PL-200 Microsoft Power Platform Functional Consultant.
- **UX & UI Design** Course from Tech Guide for Figma, Adobe Xd and Photoshop at https://www.techguide.dev/.
  Projects -https://www.behance.net/krishnakumar203
- Certification for Completion of **Python and Linux** from IIT Bombay.
- English Type Writing in Senior Grade **(FIRST CLASS WITH DISTINCTION 40 – 45 Words Per Minute)** from Government of Tamil Nadu.

TECHNICAL SKILLS :

- **Cloud & Orchestration**: AWS, Kubernetes, Docker.
- **IaC & CI/CD:** Terraform, Ansible, Jenkins, Maven, Git.
- **Monitoring & Code Quality:** Prometheus, Grafana, SonarQube.
- **Scripting & Programming:** Shell Scripting (Bash), Perl, Python, SQL, PHP, ASP.Net.
- **Frameworks:** ITSM (Incident, Change, Service Request, and Demand Management).

WORK EXPERIENCE :

HCL Technologies | Senior Software Engineer *November 2021 – Present*

Key Projects, Roles and Responsibilities:

- Handling weekly review meetings with end users.
- Provided with expert assistance and solutions to any queries raised by the clients.
- Collect new requirements directly from business users.
- Communicate technical information to non-technical stakeholders.
- Perform sanity checks proactively on daily basis **to identify any minor issues**.
- Migrating the application **from On-Prem to AWS Environment**.
- Worked with the testing team on application functionality post AWS Cloud migration.
- Responsible for maintaining and organizing source code within the project repository.
- Provided documentation and knowledge sharing to ensure the smooth onboarding of new team members.
- Troubleshooting, debugging and maintaining the existing software programs.
- Optimize costs and ensure scalability, availability, and reliability of cloud services.
- Automated server monitoring, disabling inactive users and log cleanup using Bash shell scripting, **reducing manual maintenance time by 20 hours per month** and preventing 95% of disk-space-related outages.

1. **Japan CMS (NOKIA):**

- **Automated deployments**: Set up **Jenkins** CI/CD pipelines to automate code delivery to production servers, making the software lifecycle faster and more reliable.
- **Feature development**: Developed and added new features to existing applications using **Perl**, **PHP**, and **Shell Scripting**.
- **Database reporting**: Managed and provided monthly billing data directly from the database to support business operations.

2. **Cloud DevOps (NOKIA):**

- **Containerization:** Authored and optimized Dockerfiles to automate the creation of lightweight, portable Docker images.
- **CI/CD Pipeline:** Engineered automated CI/CD pipelines using Git, Jenkins, and Maven to streamline continuous integration and build processes.
- **AWS Infrastructure:** Architected scalable AWS solutions using EC2, S3, VPC, and RDS to enhance system reliability, high availability, and data durability.
- **Orchestration & Scaling**: Deployed Auto-Scaling and Elastic Load Balancing (ELB) within Amazon EKS clusters to optimize performance and fault tolerance.

3. **Claims Dispute System (NOKIA):**

- **Feature Development:** Developed and integrated new functional modules into the ASP.NET claims application to enhance system capabilities.
- **Issue Resolution:** Managed end-to-end resolution for user claims, disputes, and approval workflow bottlenecks.
- **Identity & Access Management (IAM):** Administered user permissions and security protocols via SQL database-level access control.
- **Operational Support:** Partnered with business stakeholders to streamline application access and ensure data security compliance.

AWARDS AND ACHIEVEMENTS :

- I received a cash award for my work refactoring legacy reporting modules, where I replaced text-based outputs with Excel exports using Shell scripting and Perl.
- Appreciation received from Project Delivery Manager for completing multiple Demands and Changes tickets in the 3rd Quarter of 2024.
- Received Gold Club award for Top Performer in the 3rd Quarter of 2024.

EDUCATION:

D.G. Vaishnav College — **2018 – 2020**
M.Sc. Computer Science – 78.5% — Chennai

Date of Birth: 28-November-1997
