# KRISHNA KUMAR M

Senior Software Engineer (DevOps / Cloud Engineer)
**Contact**: +91 8056201467 | **LinkedIn**: https://www.linkedin.com/in/krishna-kumar-35ba771b3 | **Place:** Chennai, India
**Mail:** krishnakumar.2015123@gmail.com | **Portfolio**: https://krishnakumarkrish.github.io/Krishna_Portfolio/index.html

## PROFILE SUMMARY :

.

- Highly effective **Senior Software Engineer** with **4+ years of experience** at HCL Technologies specializing in Cloud, DevOps, and Full-Stack development, seeking a challenging and rewarding position to utilize my skills in designing, developing, automating, and deploying high-quality innovative software solutions.
- Proven track record of delivering scalable **AWS solutions** and **automating complex workflows** to enhance business productivity.
- Expert in the full Software Development Life Cycle **(SDLC),** with a focus on migrating legacy on-prem systems to high-availability cloud environments.
- Worked with **Japanese** and **US clients** to understand their requirement and enhance the existing features.
- Adaptive to learn new technologies and components.

## TRAININGS AND CERTIFICATIONS :

- Amazon Certified: **AWS Developer – Associate -** Credential
  AWS DevOps Engineer – Professional **(In Progress)**
- Google Certified: **Cloud Digital Leader -** Credential
- Microsoft Certified: **PL-900 Microsoft Power Platform Fundamentals** and
  **PL-200 Microsoft Power Platform Functional Consultant.**
- **UX & UI Design:** Course completion for Figma, Adobe XD, and Photoshop. Projects - Behance
- Certification for Completion of **Python and Linux** from IIT Bombay.
- English Type Writing in Senior Grade **(First Class with Distinction 40 – 45 Words Per Minute)** from Government of Tamil Nadu.

## TECHNICAL SKILLS :

- **Cloud & Orchestration:** AWS, Kubernetes, Docker.
- **IaC & CI/CD:** Terraform, Ansible, Jenkins, Maven, Git.
- **Monitoring & Code Quality:** Prometheus, Grafana, SonarQube.
- **Scripting & Programming:** Shell Scripting (Bash), Perl, Python, SQL, PHP, ASP.Net.
- **Operating Systems:** Linux/Unix, Windows.
- **Frameworks:** ITSM (Incident, Change, Service Request, and Demand Management).

## PROFESSIONAL EXPERIENCE :

**HCL Technologies** - *Chennai* | **Senior Software Engineer -** *November 2021 – Present*

**Key Projects, Roles and Responsibilities:**

- Migrating the application **from On-Prem to AWS Environment**, enabling cloud scalability and modernization.
- Optimize costs and ensure scalability, availability, and reliability of cloud services across AWS infrastructure.
- Implemented **Prometheus**-based monitoring and built **Grafana** dashboards with custom alerts, improving application observability and **reducing incident response time by 40%.**
- Automated **server monitoring, disabling inactive users and log cleanup** using Bash shell scripting, reducing manual maintenance time **by 20 hours per month** and **preventing 95%** of disk-space-related outages.
- Resolved production issues by troubleshooting and debugging existing software programs, ensuring 99.9% system uptime.
- Collaborated with QA teams to validate application functionality post AWS migration, ensuring system stability and achieving zero critical defects in production.
- Gathered business new requirements **directly from business users**, explained technical concepts clearly to non-technical stakeholders, and **led weekly review meetings.**
- Resolved client-reported issues using monitoring and logging tools, improving system reliability and reducing resolution time, ensuring **high customer satisfaction.**
- Implemented Microservices architecture with **Blue-Green and Canary deployment** strategies to achieve high availability, fault isolation, and zero-downtime releases.
- Established and managed Git-based version control systems, standardizing repository structures and branching models for streamlined team collaboration.
- Provided documentation and knowledge sharing to ensure the smooth onboarding of new team members.
- Performed proactive system health checks using monitoring tools to identify and resolve issues before production impact.

1. **Japan CMS (NOKIA):**

- **Automated deployments**: Set up Jenkins CI/CD pipelines integrated with **SonarQube** for continuous code quality analysis, automating code delivery to production environments and **improving release reliability and speed.**
- **Feature development:** Developed and added new features to existing applications using **Perl, PHP,** and **Shell Scripting.**
- **Database reporting:** Managed and provided monthly billing data directly from the database to support business operations.

2. **Cloud DevOps (NOKIA):**

- **AWS Infrastructure:** Architected scalable **AWS solutions** using EC2, S3, VPC, and RDS to enhance system reliability, high availability, and data durability.
- **Orchestration & Scaling**: Deployed **Auto-Scaling** and Elastic Load Balancing (**ELB**) within Amazon EKS clusters to optimize performance and fault tolerance.
- **Infrastructure as Code (Terraform & Ansible):** Implemented Infrastructure as Code using **Terraform** and **Ansible** to provision, configure, and manage cloud resources.
- **CI/CD Pipeline:** Engineered automated CI/CD pipelines using **Git, Jenkins,** and **Maven** to streamline continuous integration and build processes.
- **Containerization:** Authored and optimized **Dockerfiles** to automate the creation of **lightweight**, portable Docker images.

3. **Claims Dispute System (NOKIA):**

- **IIS Server Administration & Troubleshooting:** Managed and troubleshot IIS servers hosting ASP.NET applications on Windows Server, ensuring **high availability and optimal performance.**
- **Identity & Access Management (IAM):** Provided web application access to users using SQL database-level access control while maintaining security compliance.
- **Feature Development:** Developed and **integrated new functional modules using** ASP.NET and Oracle SQL to enhance application capabilities.
- **Issue Resolution:** Managed end-to-end resolution for user claims, disputes, and approval workflow bottlenecks.

## AWARDS AND ACHIEVEMENTS :

- I received a **cash award** for my work refactoring legacy reporting modules, where I replaced text-based outputs with Excel exports using Shell scripting and Perl.
- Appreciation **received from Project Delivery Manager** for completing multiple Demands and Changes tickets in the 3rd Quarter of 2024.
- Received Gold Club award for Top Performer in the 3rd Quarter of 2024.

## EDUCATION:

**D.G. Vaishnav College** — **2018 – 2020**
M.Sc. Computer Science – 78.5% — Chennai

## Date of Birth: 28-November-1997
